

# APPLIED BEHAVIOR ANALYSIS (ABA)

## WHAT IS IT?

It's Science!

While it might not seem so, behavior is lawful. Meaning, that once we understand how it works, we can assist with changes!

## HOW DOES IT WORK?

Recognizing that the issue is with the environment, not the person.

Structuring the environment for success.

Responding to the “good stuff” with reinforcement!

## RELEVANT RESOURCES

### Behavior Analyst Certification Board (BACB)

They certify us

### SD Board of Social Work Examiners

They license us in our state

### Association for Science in Autism Treatment (ASAT)

They provide helpful info

### National Institute of Health (NIH)

So does this group

### Autism Speaks

This one too
